UNPARALLELED STABILITY

Our platform is built on a robust and scalable infrastructure that ensures uninterrupted service, regardless of user volume.

Case in point: On Jan 3rd, 2021, during a significant surge in trading activity due to Bitcoin hitting a record high, TabTrader maintained its stability, enabling smooth trading amidst heavy volumes.

We jinxed it. Looks like we're
struggling again load-wise. We're
looking into it. Apologies for the
inconvenience.

Honestly,

I wouldn't be able to build my prediction algorithm without @tabtraderpro

It's the only rapid ultra high candle count mobile trading system out there. It lets me make extremely quick notes and algorithmic adjustments.

TABTRADER TOKEN

UTILITY

In-app purchases

Users of TabTrader can make in-app purchases using TTT tokens, including the acquisition of the TabTrader Pro subscription.

Yield farming

TTT token holders can earn passive income through yield farming by providing liquidity for TTT trading pairs on decentralized exchanges such as Orca and Gate.io.

FUTURE UTILITY

Governance

We are working towards developing decentralized community governance for TabTrader, where TTT token holders will have the power to propose and vote on initiatives that will shape the platform's future direction.

Referral bonuses

We plan to introduce a referral program that will offer users the opportunity to earn bonuses in TTT for referring new customers to the platform.

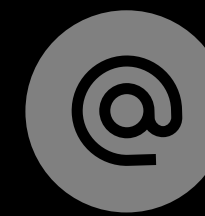

Trade mining rewards

Coming soon, our trade mining program will enable users to earn TTT tokens based on their trading activity on the platform.
